About Seres Therapeutics

Seres Therapeutics, Inc. (Nasdaq: MCRB) is a clinical-stage biotechnology company focused on improving patient outcomes in medically vulnerable populations through the use of oral cultivated live biotherapeutics. Seres led the successful development and approval of VOWST™, the first FDA-approved orally administered microbiome therapeutic. The Company is evaluating SER-155 in a Phase 1b study in patients receiving allogeneic hematopoietic stem cell transplantation. SER-155 is designed to prevent gastrointestinal (GI)-derived infections and resulting bloodstream infections, enhance epithelial barrier integrity, and induce immune tolerance responses to reduce the incidence of graft-versus-host-disease (GvHD). The Company is also advancing additional cultivated oral microbiome therapeutics for medically vulnerable populations, including those with chronic liver disease, cancer neutropenia, and solid organ transplants.
